

# AI Usage DISCLOSURE FORM

## 1. Team Details

Team Name: SnapTask

Project / Product Name: SnapTask

Organization / Institution (if any): RV College of Engineering

Submission Date: 08 May 2026

## 2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes

## 3. Purpose of AI Usage ( Brief Details)

Idea generation / brainstorming Yes — feature scope, UX flow, skill system design

Code generation or assistance Yes — Jetpack Compose UI, Node.js server, Kotlin Android code

UI / UX design Yes — onboarding pager, home screen, confirmation sheet

Content creation Yes — README, slide deck content, disclosure form

Data analysis No

Testing / debugging Yes — Compose theming bugs, Groq API integration, OCR edge cases

Other N/A

## 4. Feature Origin Classification ( Please add/delete based on the number of the feature)

1. Feature Name LLM Intent Classification

2. Self-Generated/AI-Generated/Both AI-Generated

3. Description (AI tools/platform used, prompt used, output summary, modifications) Tool: Groq API (Llama 3.3 70B). Prompt instructs the model to return all applicable actions as a

JSON array (intent, confidence, actions[]). Output: structured JSON parsed server-side.  
Modification: custom multi-action prompt, confidence scoring, and Samsung skill mapping.

1. Feature Name On-Device OCR Pipeline

2. Self-Generated/AI-Generated/Both Both

3. Description (AI tools/platform used, prompt used, output summary, modifications) Tool: Google ML Kit Text Recognition v2 (runs fully on-device). Claude Code (Anthropic) assisted with integration boilerplate and error handling. Output: rawText string forwarded to OpenClaw server. Modification: team added entity extraction pass and NO\_TEXT error state.

1. Feature Name Swipeable 3-Page Onboarding

2. Self-Generated/AI-Generated/Both Both

3. Description (AI tools/platform used, prompt used, output summary, modifications) Tool: Claude Code (Anthropic). Prompt: "Design a polished HorizontalPager onboarding with per-page accent colours and animated dot indicators." Output: OnboardingScreen.kt. Modification: copy, page content, and colour palette adjusted by team.

1. Feature Name Confirmation Bottom Sheet

2. Self-Generated/AI-Generated/Both Both

3. Description (AI tools/platform used, prompt used, output summary, modifications) Tool: Claude Code (Anthropic). Prompt: "Dark ModalBottomSheet with loading/ready/error states, confidence pill, editable fields, and multi-action layout." Output: ConfirmationSheet.kt. Modification: team refined confidence threshold logic and dark theme rendering fix.

1. Feature Name OpenClaw Node.js Gateway

2. Self-Generated/AI-Generated/Both Both

3. Description (AI tools/platform used, prompt used, output summary, modifications) Tool: Claude Code (Anthropic). Team designed the SKILL.md plugin architecture and wrote all Samsung-specific skill index.js files. Claude assisted with Groq SDK migration, multi-action dispatch loop, and JSON response parsing.

...

## 5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

## **6. Declaration & Sign-Off**
